

IT Team Ministry Guide

The purpose of the IT team is to provide technological solutions and support to the church and Dream Team.

Infrastructure

Compass North Church has a network of switches, security cameras, and wireless access points to support other teams and each person who enters our church.

Data

We will occasionally come across private data when working on IT projects. Be respectful and maintain the utmost security standards when working around sensitive data. By doing this, we are honoring each individual that has trusted us with their information.

Applications

There are a variety of applications the church uses including Planning Center, Slack, and much more.

Team Expectations

Be Respectful

While we may not always agree, it's important to align to church vision and the direction of its pastors and leaders. We also honor each person who walks through the doors or attends events because we're called to serve them.

Be Responsive

Life at Compass North can move quick. We don't require you to be glued to your phone all the time, but as a courtesy please respond to all messages within a day unless you're on vacation.

Attend Dream Team Events

They are super fun! We only have a couple a year, but they help us connect with the larger Dream Team and celebrate what God is doing in our church.

Welcome to the Compass North _____ Team.
